Dr. Stan's Commentary on the Race

Whenever a 2 year old races in their 1st or 2nd lifetime race and first time on turf particularly around 2 turns it is impossible to predict what will happen. Particularly from the 10 hole where you know she will be wide If watch race you can see she is wide around first turn and then midway down backstretch and again goes wide at top of stretch. In other words she ran nearly a mile instead of the 7 1/2 furlongs and still got up to win which makes the win more impressive. So much so that we are discussing placing her in a 2 year old low level stakes race on turf and see what we have. Should improve after this race. Always interested in answering any questions!! STAN
